# The Ritelite Product DNA

When you purchase a Ritelite lighting product you are buying into Ritelite's specific design philosophy behind every product to provide the highest level of "usable light" to the widest range of work task situations. We manufacture products which are:

## BEAM CONTROLLED DESIGN

Designed to give maximum useful light for any application with bespoke beam controlled lensing ensuring glare and light pollution are minimised.

## EFFICIENT

Designed to be as efficient and energy saving as possible maximising power resource availability whilst providing ultra bright high powered LED light for training and playing sport on any court or pitch.

## FLEXIBLE & VERSATILE

All Ritelite products are flexible and versatile enabling them to be used in multiple applications both indoors and outdoors. Portable and mobile, compact to store and transport.

## ZERO EMISSIONS

All products are able to be supplied with zero emission, silent running power solutions either with in-built highly efficient lithium batteries or via the RITE-POWER portable battery generators.

## ROBUST & RELIABLE

Waterproof, dust proof and shatter proof. Designed to be robust and reliable for the often harsh environments that they are used in.

## BUILT TO LAST

Manufactured using high quality components to maximise product life and continue to perform exceptionally for many years.

# Why do Clubs and Organisations need a Ritelite Portable or Mobile Lighting Solution?

Ritelite's portable and mobile LED lights provide a solution for many clubs and organisations who are struggling to continue training and playing sport during the winter months for a number of different reasons including:

Unable to get planning permission or do not have enough budget for permanent lighting

Want to light up different areas of a pitch or multiple pitches or courts at different times so need a flexible solution

High cost of hiring floodlit pitches in local area – would like to keep training at home pitch / ground

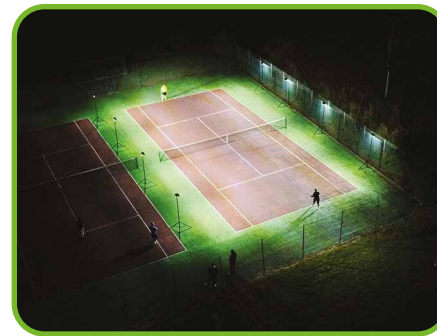

Need a semi permanent installation as don't want to completely pack away lights in some applications

Would like compact, lightweight products to transport and store between training sessions

Would like to train more players every week by lighting up more areas. Keep training in realistic match conditions rather than having to train in indoor sports facilities due to lack of outdoor lighting

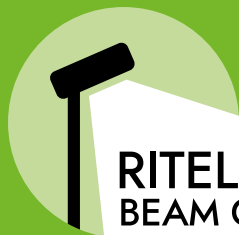

Need low light pollution solution so as not to impact neighbouring houses / areas

Have permanent lights on the main pitch but want to keep that for matches and train on another areas

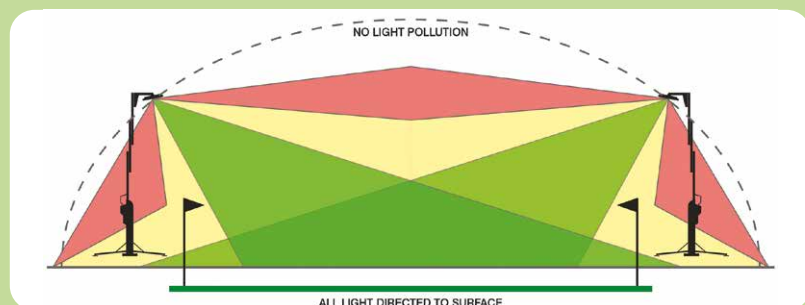

## Ritelite's LED Sports Lighting Products – Designed for Maximum Light on the Playing Surface

**RITELITE  
BEAM CONTROL**

Beam Control ensures all the light is directed towards the required surface offering uniform light for training or playing any sport.

Example of beam control for sports

Beam controlled light,  
minimises light pollution

Designed for any outdoor  
sports application

Fully dimmable for optimum  
control of light output  
& run time

## How Ritelite Products are Designed for Sport

All light directed onto the playing surface with  
low light pollution to surrounding area

Optically designed for uniform light  
coverage across the playing surface

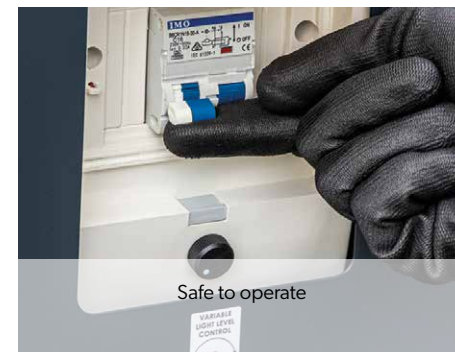

Battery power solutions  
for silent cable free setup

Compact to store and transport. Solutions from  
hand carry 60 x 40m training to full size pitches

Easy and quick to setup

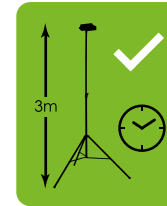

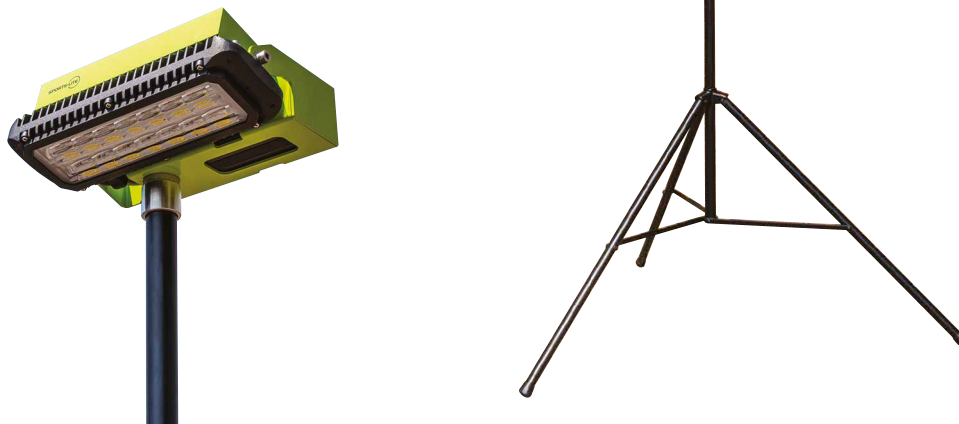

Safe to operate

# SPORTS-LITE

## Portable Rechargeable Sports Training Light

**The Sports-LITE portable rechargeable sports training light kits are a fantastic, affordable solution for clubs and organisations to train through the dark winter nights on any pitch or court without requiring planning permission. With no trailing cables and silent battery-powered operation the Sports-LITE is fast to set up on any training area and packs away into the supplied waterproof carry bags for easy transportation and compact storage.**

Fast and easy to setup in under 1 minute per light. 3m height perfect for training.

Lightweight, compact to store and carry. Supplied with waterproof carry bags.

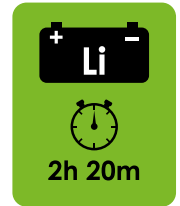

Beam controlled light, minimised light pollution.

Designed for use in multiple sport applications. Kit options for all training requirements.

No planning permission required - can be used anywhere for any sport

Fully rechargeable lithium batteries, over 2 hours 20 minutes duration

Safe, silent and zero carbon, no cables or fuel costs

# QUAD POD K65

## Mobile Sports Lighting Tower

The Quad Pod K65 mobile sports lighting towers are a highly efficient area floodlighting solution for a wide range of sports applications combining optimised illumination and uniformity with minimised light loss, glare and light pollution. Easy to manoeuvre on any terrain and compact to store through a standard sized door the Quad Pod extends to 6.5m in height and can be powered by mains, diesel generators or battery-powered generators.

Rapid, safe deployment. Up to 6.5m height for match play and training.

Superb illumination from low power requirement

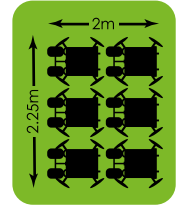

Beam controlled light, minimised light pollution

180° - 360° adjustable light heads to meet all training requirements

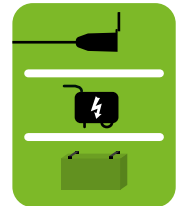

Easy to manoeuvre - will fit through standard doors

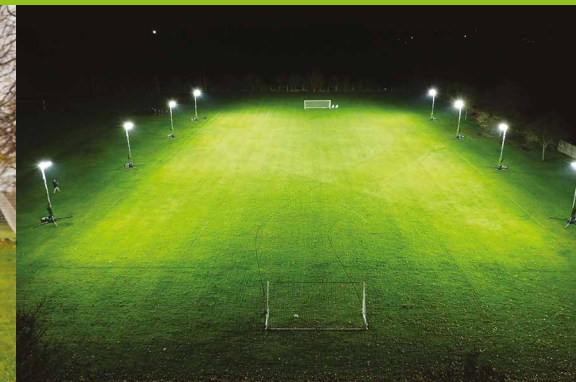

Compact when stowed

Designed for use in multiple sports applications

Powered by mains, generator or RITE-POWER battery generators
