

Quad Pod K50 & K65 Beam Control

A highly efficient area floodlighting solution combining optimised illumination & uniformity with minimised light loss, glare & light pollution for a wide range of industrial applications

FEATURES

- High Power Beam Controlled LED light heads providing up to 195,000 lumens from a maximum 1460W power consumption
- Minimised light loss, glare and light pollution. All light directed onto required surface
- Light heads can be positioned for 180° or 360° illumination
- Compact and easy to store, transport and set up
- One person quick deployment
- Unique parallel mast design for easy and safe handling even on difficult terrain
- Safe to operate
- Silent, fume free operation
- Powered by diesel generators, mains power or RITE-POWER range of portable battery powered generators

LIGHTING FOR ALL APPLICATIONS

360° Area Lighting

Directional Area Lighting
