HUSQVARNA FLEET SERVICES™

A digital solution for your asset management.
On the web and in your smartphone.

WHAT IS FLEET SERVICES?

Husqvarna Fleet Services is a cloud-based service that enables construction contractors and rental companies to view their entire fleet inventory both out in the field and in the warehouse, and get information such as:

SERVICE OVERVIEW

IS IT TIME TO SERVICE OR REPLACE?

INVENTORY CONTROL

WHAT EQUIPMENT DO WE HAVE?

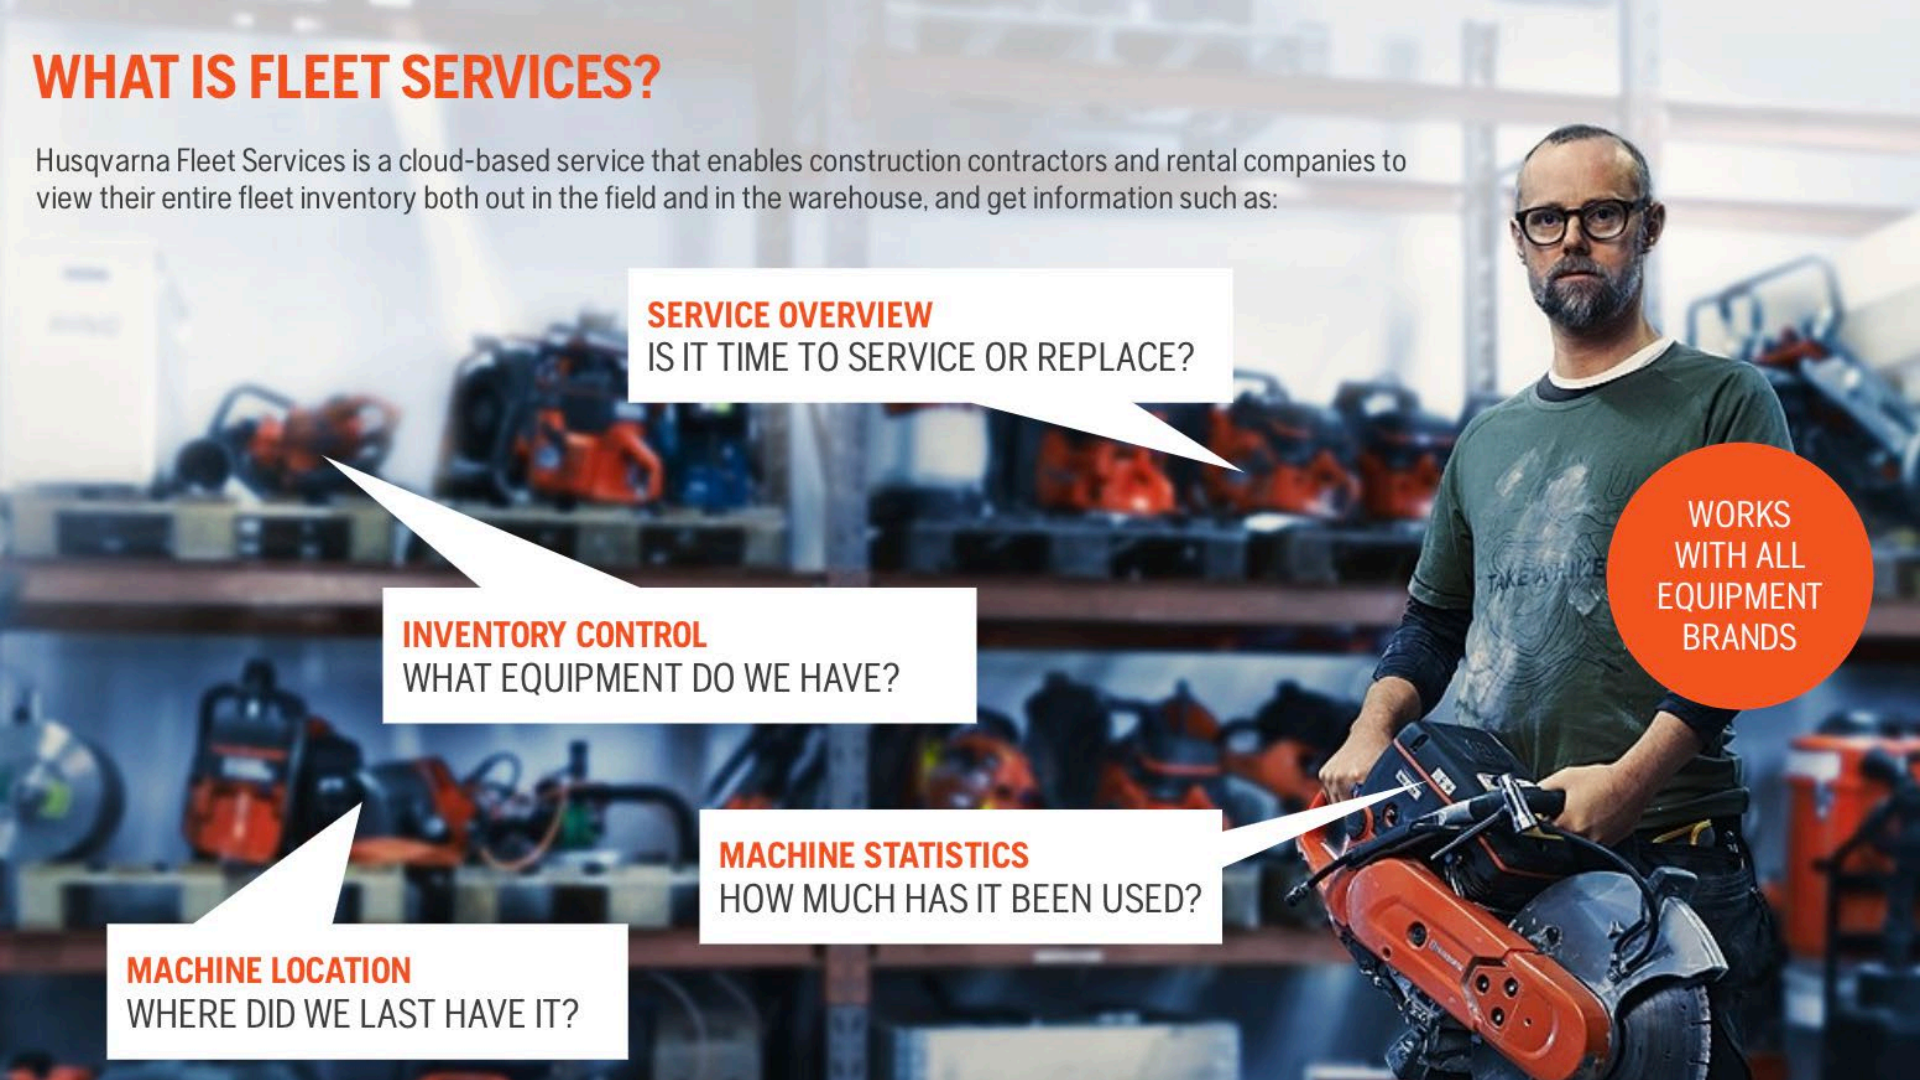

MACHINE LOCATION

WHERE DID WE LAST HAVE IT?

MACHINE STATISTICS

HOW MUCH HAS IT BEEN USED?

WORKS
WITH ALL
EQUIPMENT
BRANDS

The Core Four Jobs

The image displays four smartphone screens illustrating the core functions of the Husqvarna mobile application:

- INVENTORY CONTROL:** A list of machines with their status (e.g., "OUT WORKING", "ON THE SHELF") and last update time.
- MACHINE LOCATION:** A map showing the location of a specific machine with its coordinates (42.8139387, -88.183887).
- MACHINE STATISTICS:** A bar chart showing machine usage for Week 42 (10 Oct 2018 - 7 Oct 2018). The chart compares working hours (green) and idle time (orange).

Day	Working Hours	Idle Time
10-01	16.1	8.9
10-02	16.1	8.9
10-03	16.1	8.9
10-04	16.1	8.9
10-05	16.1	8.9
10-06	16.1	8.9
10-07	16.1	8.9
- SERVICE OVERVIEW:** A detailed view of a machine's maintenance history, including total engine running time (4.7 hours), next service interval (20.3 engine hours), and a record of a service/repair performed on 27 Dec 2018.

EMBEDDED AND EXTERNAL SENSORS

Creating a basic setup with Fleet Services requires just three components: a sensor, a Fleet Services app and a Fleet Services website account. Sensors can be either embedded or fitted to the exterior of the machine.

+ BLUETOOTH SENSOR
EMBEDDED OR EXTERNAL

+ MOBILE APP

+ WEBSITE

EXTERNAL BLUETOOTH SENSOR

For older and third party machines, a Bluetooth sensor can be fitted to the exterior of a machine. The sensor will track and store data about when and how the machine is being used by sensing the electrical field in a petrol, diesel or electrical machine.

It connects to Husqvarna Fleet Services cloud in the same way as the embedded sensor through an app on a mobile phone.

EMBEDDED BLUETOOTH SENSOR

Starting Autumn 2019, most Husqvarna Construction products will include an embedded Bluetooth sensor. While the machine is in use, the sensor will track and store data about when and how the machine is being used.

Once the machine is turned off, the sensor will start uploading the captured data to the Husqvarna Fleet Services cloud through an app on a mobile phone.

ALL YOU NEED IN ONE BOX

To make it easy to get started with Husqvarna Fleet Services™, our starter kit includes everything you need: 5 Machine sensors with Bluetooth, wireless gateway and how-to instructions.

STARTER KIT

USA Part No. 597283401

EU Part No. 597283402

- Five machine sensors.
- Machine sensor key
- Gateway smartphone and wall mount
- Quick start guide
- 2 year subscription to Husqvarna Fleet Services

IF YOU NEED HELP DURING INSTALLATION, PLEASE CONTACT YOUR HUSQVARNA REPRESENTATIVE.

HARDWARE PRODUCTS

Husqvarna offers a number of products to facilitate connection to Fleet Services. All our products are supplied with clear installation instructions but many customers will prefer the convenience of having a certified Husqvarna dealer to perform the installation.

SENSORS **Part No. 597525001**

The machine sensor allows you to track all sorts of handheld equipment and mowers.

Each pack contains 5 sensors.

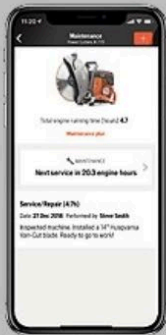

FLEET MACHINE SENSOR KEY **Part No. 585477601**

The Fleet machine sensor key is used to open and close the sensor, for instance to change the battery.

Each pack contains 10 keys.

SUBSCRIPTION PRODUCTS

FLEET SERVICES APP

The app collects all equipment data via Bluetooth once machines are within range. The app gives easy access to your data and last known location, and the data is uploaded to your account from wherever you are.

Available for iOS and Android.

GATEWAY APP

The gateway app is the “at home” solution that transfers the collected data from the sensors via Bluetooth and uploads it to your account. Install it in your storage area to ensure that all equipment has been properly checked in once the workday is finished.

Available for Android.

FLEET SERVICES PORTAL

As soon as the data has been uploaded to your account, you can instantly access it through the web interface from your computer or tablet. All your data is safely stored in the cloud in your organization's Husqvarna Fleet Services™ account, so you can access it from anywhere.

Online web interface.
