

Solving Real-World Problems through Communication

Leverage innovative communication solutions to drive safety, efficiency and productivity.

Syndico Distribution Ltd

Syndico is an added-value distributor of technology solutions which help businesses to improve team collaboration, enhance staff safety, drive new efficiencies and increase profitability.

Founded in 2015, Syndico specialises in critical communication solutions and has extensive expertise in two-way radio and push-to-talk systems. Since then, we have grown and diversified our product portfolio to include team communication headsets, commercial drones, body cameras, rugged smart devices and hearing protection solutions – all of which add significant value to customers in virtually all major market sectors.

Syndico services a network of over 600 reseller partners across the UK and EMEA region, providing them with best-in-class logistics, technical, customer service and sales and marketing support.

Syndico is a trusted partner of Speedy Hire for supply and support of two-way communication and drone products and solutions.

Gareth Jones (Head of Sales)

Gareth is a founding member of Syndico, and has been dealing with Speedy Services since 2008 as a specialist supplier of push-to-talk communications products.

How can we help...?

Railways are at the core of the UK's economic and social economies.

Maintaining, operating and developing the UK's rail networks is a vital infrastructural responsibility, and we believe that empowering the organisations and humans who undertake this crucial work should be empowered and equipped accordingly.

As a specialist in rugged push-to-talk communications, we help our partners to use communication to drive efficient, safe and productive working practices.

Drive Productivity

Push-to-talk is the most efficient method of communication for on-site workers, helping them to be safer and more productive.

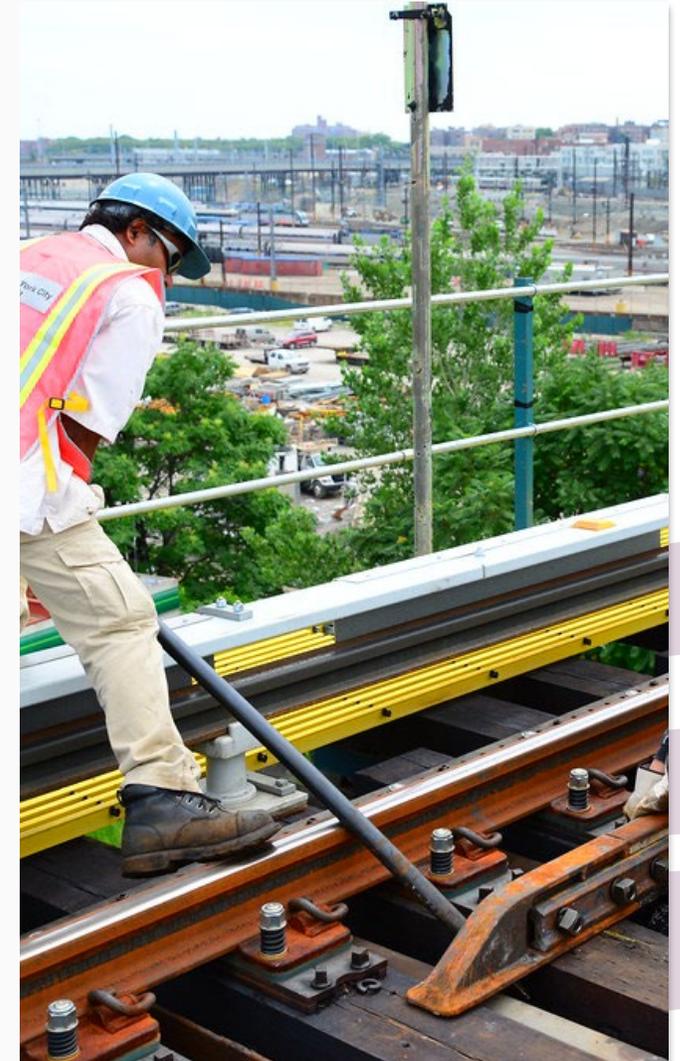

Quality Management

The right communication tools can help to monitor quality and competency, capturing important audit trails so that safety and efficiency can continually improve.

Monitor Lone Workers

Safety and wellbeing of lone workers is vital, and the right communication tools can ensure that they are monitored sufficiently and never feel disconnected.

Brand Focus: KENWOOD

KENWOOD is one of the leading brands in the communications market, designing and manufacturing robust, reliable and feature-rich professional communication terminals which are known for delivering the greatest levels of performance, quality and value.

KENWOOD communication solutions are designed and engineered by professionals, for professionals. When you choose KENWOOD, you are choosing to invest in one of the World's leading communications brands which is renowned for reliability, robustness, security and superior voice clarity.

Made in Japan

A Japanese company, one of KENWOOD's key principles is "Monozukuri" – a Japanese term which refers to the "art" of making things and a key concept in Japanese craftsmanship.

Features and Value

KENWOOD provides all the hardware, software and support you need to build an innovative, reliable and future-proofed communication system from the ground up and within budget.

Renowned Quality

The KENWOOD brand has long been associated with quality, reliability and innovation, and is the trusted communication technology for some of the world's largest operations.

Product Focus: NX-5000 Series

KENWOOD's flagship digital handheld radio, KENWOOD NX-5000 Series has an integrated SD card slot for audio recording – ideal for quality and competency management.

Brand Focus: Zebra Technologies

Workcloud Communication from Zebra Technologies allows frontline workers to collaborate clearly, accurately and flexibly wherever they are in the business – both inside and outside the four walls.

A suite of software applications which attach to Android or iOS smart devices, Zebra Workcloud Communication is a solution for businesses who want to drive effective communication across the entire workforce. Broadcast messages to everyone in an instant, allow colleagues to be deployed more flexibly across the business, give colleagues a tailored device experience depending on their specific role, and answer colleague and customer questions quicker for an overall more efficient operation.

Empower flexibility

Provide the right communication tools for mobile employees such as area managers or field engineers who need flexibility.

Drive productivity

Implement a communication solution which connects team members wherever they are and using whichever device they have, giving them the best chance to work productively.

Cost-efficiency

Instead of equipping employees with multiple devices which all have maintenance and depreciation costs, consolidate multiple functions into one smart, rugged device.

Product Focus: Zebra Workcloud

Workcloud is Zebra's communication platform which attaches enterprise-grade two-way radio functionality onto an Android or Smart device.

Three key reasons why you should be thinking about comms:

1

Improved Business Productivity

When team members are connected and can easily and freely communicate, they are considerably more likely to work productively and collaborate efficiently. This directly impacts bottom-line and likelihood to meet deadlines.

2

Enhanced On-Site Safety

The ability for colleagues to communicate instantly on-site using a purpose-built and robust system can significantly boost safety – especially when hazards are commonplace and jobs require loan working.

3

Quality and Competency Management

Providing your teams with the right communication tools can support quality and competency management. Creating valuable audit trails and identifying learning opportunities can deliver benefits across the entire business.
